DETAILED ACTION

Allowable Subject Matter

1. Claims 1-13 are allowed.
2. The following is an examiner's statement of reasons for allowance: Independent claim 1 recites the uniquely distinct features for "decompressing each digital image file to a bitmap format image file; converting the bitmap format image files to TV system format image files; compressing the converted TV system format image files into MPEG files" and for "determining whether any digital image files are left in the memory medium, and if yes, returning to Step c, and, if not, continuing to step I.". The closest prior art, Jones et al. (US 2002/0118949), Loui et al. (US 20030206729), Torres et al. (US 6,738,075) and Durlach (US 6,807,367) teach systems that use multiple image files by combining them together to create an MPEG stream, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
